TREES FOR MONTFORD

Lynn Raker

Only a year and a half after Helene devastated our tree canopy, Montford is already making meaningful strides toward rebuilding it. Perhaps reforestation is an exaggeration—given our dense housing and infrastructure, it has been generations since Montford could truly be described as “forested.” Still, for a neighborhood just steps from a lively downtown, we can proudly claim a remarkable wealth of mature trees and the vibrant wildlife that depends on them.

A study quantifying the percentage of canopy lost between 2022 and the summer of 2025 is expected to be released this summer, according to City of Asheville Urban Forester Keith Aitken. While the data will not distinguish between trees damaged by Helene and those removed afterward, it will provide a valuable snapshot of overall loss and help us set realistic replanting goals.

Even without the numbers in hand, we know our neighborhood’s canopy was severely compromised. Wildlife at least appears abundant again—an embarrassment of squirrels, the return of our stealthy hawk to its nest, bears lurking about to do what bears do, and the full chorus of insects, birds, reptiles, and mammals that share Montford with us. Yet one can’t help wondering how many were lost or forced to relocate in search of food and shelter after the storm.

Rebuilding our canopy is not optional. To maintain—and ideally surpass—the pre-Helene

ecological balance, we must commit to a robust, sustained tree-planting effort. Even before the hurricane, Asheville had already experienced a decline in canopy coverage. Once the new study is released, we hope to determine how many trees need to be replanted and to set realistic annual goals for restoring our leafy infrastructure.

But a lack of hard data hasn’t slowed us down. Thanks to revenue from the 2025 Montford Garden Tour, we planted 25 native canopy trees this past fall and winter – oaks, maples, black gums, and sycamores. Ten were placed on private property, and 15 were added to Tempie Avery Community Center, Hummingbird Park, Montford Park, and Reed Creek Greenway. Four of the Greenway trees were generously donated by Rosewood Landscape Company.

We encourage all residents to plant a native tree this year. If you have space, consider a large canopy species; if not, a smaller ornamental tree can still provide habitat, beauty, and essential environmental benefits. Every new tree strengthens the health and resilience of our neighborhood.

To learn more—or to receive financial assistance—please visit the Montford Tree Grant Program at montford.org.

Forever Montford

WELCOME PACKET

Dan & Judith Sanford

Forever Montford, a committee of the Montford Neighborhood Association (MNA) has created a Welcome Packet for new Montford residents. The packet contains information such as a brief history of Montford, a list of MNA board members along with contact information, Montford listserv, Montford newsletter, neighborhood parks, events, restaurants, maps, volunteer opportunities and much more. Packets are being delivered by MNA board and Forever Montford committee members upon learning of new residents. Recipients of the Welcome Packet have shown great appreciation with one neighboring writing, “Looks like we lucked out in the neighbor and neighborhood department! I appreciate the history and local information. Well done, and thank you for your thoughtfulness.”

If you are new to Montford or know of a new resident, please contact one of the below, and we will coordinate delivery of a Welcome Packet.

Dan Sanford: sanford.danielj@gmail.com

Judith Sanford: sanford.judith@gmail.com

Green Corner

Erin Hiatt

For this month's Green Corner, we are interviewing a longstanding local, sustainability-linked organization that would welcome your support!

Our thirteenth feature is **Asheville GreenWorks** located at 2 Sulphur Springs Road Asheville, NC 28806

Q: What is GreenWorks and how did it get started?

A: Asheville GreenWorks is a nonprofit organization that works to protect the health of the French Broad River watershed through community mobilization, with a focus on environmental justice. We started in 1973, known back then as Quality '76, ahead of the U.S. Bicentennial with the goal of cleaning up the French Broad River. Quality '76 leadership recognized the ongoing need for clean-ups, tree plantings, and environmental protection, so we became Quality Forward until 2007, when we became Asheville GreenWorks.

Q: What are the organization's main initiatives/activities?

A: Our primary activities fall into four program areas: reforestation and urban forestry, litter and debris clean-ups, waste reduction and recycling, and youth environmental leadership. Thousands of people have engaged with our work over the years as volunteers helping pick up litter along our roadways, and as participants, receiving trees from us during our community tree distributions and bringing things to our Hard 2 Recycle events to divert waste from our landfills!

Q: Any favorite volunteer or donation stories?

A: It's so hard to pick just one! I love meeting so many people who care deeply about our community and environment! My favorite days at GreenWorks are ones where I participate in volunteer projects and get out of the office by welcoming people to Hard 2 Recycle, pulling PVC pipe out of the French Broad River, and

planting and giving away trees in Marshall and Hot Springs. Volunteering with GreenWorks is about much more than just participating in a workday - it's about empowering ourselves and our community to act in the face of, what can feel like, really overwhelming environmental issues today.

Q: How can people engage or support?

A: Sign up to join us for a volunteer opportunity! We have volunteers working with us almost every single week of the year. From in-office support via data entry to sapling care in the nursery, our [volunteer website](#) lists upcoming opportunities. We also accept [donations!](#) Our work wouldn't be possible without the dedication and support of Asheville's community of volunteers, donors, and GreenWorks' fans, spreading the word about what we do!

Q: How can readers stay up to date?

A: Follow us on [FaceBook](#) and [Instagram](#) or sign up for our [newsletter](#). Our Director of Impact and Engagement, Carrie Harmon, writes the best newsletters (and P.S.'s) out there.

Let me know what other local businesses you would like to see interviewed at montfordgreencorner@gmail.com. You can find past Green Corners on the [Newsletter Archive page](#).

The Latest Dirt

By Cherie Morris

Heed the old adage, “And on the seventh month, gardeners rest.”

Yes, I did make that up, but it’s an excellent plan. Just grab a chair and a book and enjoy your garden handiwork. Planting and dividing should be paused until the cooler weather of late September and October. Remember to keep watering, especially during our hot dry spells. Did you know that Asheville is the driest location in North Carolina? It’s in the state record books! Remember, if possible, water in the morning or the evening. Watering in the heat of the day isn’t healthy for you or the plants.

Summer is a perfect time for a stroll in the quietude of the botanic garden. As sat in the shade today in the bird garden, I called up the Cornell University ornithology app called Merlin on my phone. I heard and identified 6 different species in five minutes. Downloading the Merlin and PlantNet apps will make your walks more interesting and educational although we have installed lots of new colorful and informative signage on the trails. So what’s blooming in June? Bee balm, wild bergamot and bleeding heart caught my eye in the two new native prairie plantings near Broadway. I also stopped to admire the craftsmanship of the woven twig fence blocking the street traffic. Great idea, but requires more patience than I can muster these days! Near the entrance stairs the bright yellow bloom of the prickly pear cactus demands your admiration, and yes, NC has a native cactus! Further down the trail, the Caltalpa tree blossoms are busily attracting hungry hummingbirds. Catalpas are also host plants for the sphinx moth, and while we rarely see these night time visitors, their caterpillar, a quite spectacular bright yellow and black fellow, irresistible to blue gill and catfish, are well known to fishermen! They are even available frozen online.

As summer progresses, a variety of wildflowers will pop up on every turn of the path. Even after one of those infrequent rains, populations of fungi will appear. I’m sure there’s an ID app for those too, but we offer great mushroom field guides for sale in the gift shop. We also have an ever-changing selection of used and new books and gifts for children and adults. For members only, we’re offering something new. On the last Friday of every month, Jamie Santamour, our director of development, will host Coffee at the Cabin from 9-11 at the Hayes Cabin. Share a cuppa, meet and chat with Jamie. Not a coffee drinker? You’re welcome to BYO non-alcoholic beverage or stop at the visitor’s center for a cold Devil’s Foot sparkling water. Our staff spent all day yesterday cleaning the historic cabin, readying it for our guests! Not a member? No problem. Call us at 828-252-5190, stop in any day 10-4 or visit our website at www.ashevillebotanicgarden.org and purchase a membership. That gets you discounts at the Garden Path Gift Shop, the twice annual plant sales and free or discounted classes. Join and come grow with us. Meet you at the Cabin!

Pack Memorial Library **67 Haywood Street in** **downtown Asheville**

Are you new to the neighborhood or has it been a long time since you last visited Pack Memorial Library in downtown Asheville? There are endless resources to explore or to discover:

- **Over 150,000 items available for browsing and lending.** These resources include books, periodicals, CDs, DVDs, and research materials. The library also participates in statewide resource sharing and offers inter-library loans.
- **Free internet access, public computing, and Wi-Fi.** Photocopy and printing services are available for a small fee.
- **Free laptop and hotspot lending program.** Laptops and hotspots are now available for a free 30 day loan with a library card.
- **Free tickets to local attractions.** Use your library card to sign up for Zoom passes, which are free tickets to local attractions like the WNC Nature Center, the NC Arboretum, or the Asheville Museum of Science.
- **Free digital audiobooks, e-books, magazines, and movies.** The Libby app from Overdrive provides downloads of these items to your smart phone, tablet, or computer. It's like an Audible subscription service, but free with your library card.
- **A vibrant and inviting children's library.** The library has books for all ages and reading levels, and board games, and sporting equipment available to lend.

- **Thousands of unique local historical records, photographs, maps, and memorabilia.** The Buncombe County Special Collections Library provides researchers the resources and expertise they need to understand and interpret the history of Western North Carolina.
- **Bookends Used Bookstore offers bargain prices for a wide variety of books and media, including vintage and collectible materials and bestselling fiction.** Proceeds from the sales benefit the library programming.

For more information, visit the library or their website:
<https://www.buncombecounty.org/governing/depts/library/branch-locations/pack-memorial.aspx>

Parking in the Civic Center parking ramp is free for the first hour. The library is also walkable from the Montford neighborhood.

MONTFORD NEIGHBORHOOD ASSOCIATION (MNA) QUARTERLY COMMUNITY MEETING

Odyssey School - Wednesday, April 22, 2026

The meeting was called to order by President Randy Hall at 6:33 PM. There was a good turnout of about 45 neighbors in person. For the first time the meeting was also available on Zoom because of new communications capacity Odyssey School had obtained from the City of Asheville with MNA assistance. Several neighbors were on Zoom. Since the system was being used for the first time it was unclear how many people were watching and listening to the meeting and the Zoom participants were unable to speak at the meeting. Needless to say, use of the new Odyssey School system will need more work before the next neighborhood meeting. Our apologies to those whose participation was less than optimal.

Asheville Police Department – Officer Blake Fadler

Community Engagement Officer Blake Fadler (bfadler@ashevillenc.gov) shared staffing information as APD is coming closer to its goal of reaching full strength with 220 officers. The number now is 170 including 19 officers in field training. 10 are in the academy, about double the last class.

As every meeting, our APD engagement officer took questions. Unfortunately, one person participating remotely was unable to ask her question during the meeting because of a glitch in the new IT. It should be pointed out that a reason the minutes are circulated and contact information is included is so that our residents may easily contact our engagement officer.

Asheville Neighborhood Co-Ordinator – Trey Irby

Trey Irby (tirby@ashevillenc.gov) reported on the process and approval of MNA's Stumptown grant from the City of Asheville about which Karen MacNeil and Lynn Raker reported further later in the meeting.

Tempie Avery Community Center

Because of a staffing shortage Seth Jackson was unable to attend and sent word that he would post on Montford List Serve the information he would have reported at the quarterly neighborhood meeting.

Asheville Greenworks – Lynn Raker and Eric Bradford

Lynn introduced Asheville Greenworks Operations Manager Eric Bradford an expert on reducing invasives and urban reforestation. He gave an excellent presentation on Residential Treatment Methods for Common Invasive Plants.

Garden Tour Fund Projects – Lynn Raker

Lynn reported that from the Garden Tour proceeds 25 native trees have been planted in Montford to partially restore the neighborhood's tree canopy after large loss in Helene. In July the City will release its tree canopy survey. Lynn would like to see MNA commit to plant at least 10 more trees.

Reed Creek Greenway Update/Kudzu – Susan Eggerton

Susan reported tremendous progress including that this long, hard project is coming to the time for seeding when native grass will be planted and straw put down. Eric Bradford of Greenworks offered to come to the next Montford Meadow workday. Once the grass has gotten going work will begin getting rid of invasive trees along the Greenway.

Financial Report – Susan Eggerton

Current financials were circulated and in line with budget. Susan asked that people make suggestion as to what they think MNA funds should be spent for. The new officers to be elected at this meeting and the other board members will work on the next budget.

Update UNCA Millennial Campus and Broadway – Bill Eakins

Since Bill, Randy Hall and Lynn Raker spoke to UNCA's information gathering commission in late March, the University has put their testimony on the campus website along with the testimony of anyone else who testified. There have been no public updates of the University's plans. Bill noted that in MNA's survey of Montford the main reasons almost all respondents opposed the University's prior possible plans was destruction of urban forest, noise and traffic. Whatever the University does on the west side of Broadway would impact Montford most. Preservation of the Odyssey School, which is a UNCA tenant, is important, and given the shortage of childcare in our area expansion of Odyssey is something we have suggested UNCA consider.

Bill reported that a few days before he had been asked to attend a Broadway pedestrians meeting with Council member Maggie Ullman about possibly petitioning for a pedestrian safety study of Broadway. There are a lot of aspects to this. Clearly, new residential and commercial development, including where the ABC store is and the old Moog site, will need pedestrian safety improvement. Further out from downtown there are already walk lights at Chestnut and a pedestrian crossing was added at Station 13. Needs further from downtown may be impacted by any UNCA plans or need to be considered in light of proposals for any new use of the UNCA property west of Broadway. Considerations like lanes can impact stormwater and other environmental issues. At the meeting Council member Ullman suggested that the group coordinate with Asheville on Bikes and learn from their successful work with NCDOT on Merrimon. Montford is the only neighborhood on the west side of Broadway and MNA and our residents should be consulted going forward. The MNA board will be considering how best to participate and provide input.

Stumptown Grant – Karen MacNeil and Lynn Raker

Karen and Lynn reported that the Stumptown grant was approved to recognize Stumptown with sign toppers and with an interpretive sign at Tempie Avery. Meetings with Stumptown representatives and City personnel will proceed and the new signage may come to fruition as early as August.

Board and Officer Elections – Randy Hall

New at large board members Carol Tannenbaum and Marguerite Nivens were elected. The officers elected were Bill Eakins as president, Karen MacNeil as vice president, Susan Eggerton as treasurer and Marti Boyles as secretary. The 2026-2027 Montford Neighborhood Association Board is, therefore, those 6 members plus former president, Randy Hall and at large member, Susan Loftis.

Bountiful Cities – Cathy Cleary

Cathy reminded those in attendance that the garden at the end of Pearson has belonged to Bountiful Cities since they acquired it from ABCCM and that they have programs and facilities to grow and make available fresh, healthy food of which they gave away over 1,000 pounds last year. For their second and fourth Wednesday markets see their website www.bountifulcities.org and drop by right here in Montford at their Pearson garden.

President – Bill Eakins

After a request by Bill Eakins for any new or old business, the meeting stood adjourned at 7:45 p.m.

Respectfully submitted, by Bill Eakins, Acting Secretary for Tom Fehsenfeld, deceased and sorely missed.

- Call your neighbors, Leslie and David Humphrey 277-5164

Dear Neighbors,

We all appreciate the vibrant community spirit shown through flyers for garage sales, estate sales, moving announcements, and missing pets. These notices help us stay connected and informed.

However, once the event has passed, many flyers are left behind and eventually fall into the street or into storm drains, creating clutter and contributing to pollution in our water system.

Kindly consider removing your flyers promptly after your event concludes.

This small act helps keep our neighborhood clean, safe, and welcoming for everyone.

Thank you for your understanding and cooperation!

Please refer to the website (www.ashevellenc.gov) for the full approved minutes after the following month's meeting.

What bears do in June

June at a Glance: Yearlings leave mom and search for food, shelter and a place of their own. Adult males travel far and wide looking for mates. Nursing moms venture farther from home base searching for food. Cubs keep growing and developing. Spring lessons can be life-changing.

Yearlings Move Out

Bears that were born last spring and denned up with mom this past winter are now 18-month old yearlings. If all goes well, they'll be the size of a medium-sized dog by the end of June, although their fur coats can make them look larger. Yearling females are often allowed to move in next door to their mom. Yearling males are strongly encouraged to move out and go find a new territory of their own, so most young bears wandering far from home are males.

Spring Lessons Can Be Life-Changing

Yearling bears may look big and furry, but they are all trying to figure out how to live without their mom's help. They are often lonely and lack the fully developed survival skills of an adult bear. Also hungry and inquisitive, they will instinctively check out anything that seems as if it might be a source of food.

Like human teenagers, yearlings are at a very impressionable stage of life. If they quickly discover that human places should be avoided, they will learn to support themselves as wild bears. If they find the backyard pickings are easy, they start down a road that is often a dead end. No matter how cute they look and how hungry they are, never feed or approach them. The best thing you can do to help yearling bears grow up wild is to make sure there's nothing around your home to attract them. (Download our Be BearWise at Home Checklist.)

Adult Bears Look for Mates

Female bears that are now empty-nesters as well as mature females that didn't give birth last winter will soon be ready to mate. Female bears seldom leave their home ranges; for

Photo: Tom Harrison

the good of the gene pool, they let the males come find them. A female bear may mate with several different males, and it's not uncommon for litter-mates to all have different fathers.

Black Bears in 2 Colors

Chances are these two black bear cubs are siblings with the the same mom but different fathers. Black bears can be many colors, including just about every shade of brown. (photo: NPS / Neal Herbert)

Ranges, not Territories

Black bears are typically not territorial; their home ranges often overlap. A home range needs to be large enough to provide food, water, shelter and mates. The size of a home range varies greatly, but a male bear's home range can be up to 300 square miles, typically five or six times larger than a female's living in the same general area. Several females

may live within the home range of an adult male and yearling bears of both sexes often hang out with each other.

Cub Nursery School Continues

Moms are still nursing, but cubs are learning how to supplement their diets with more natural bear foods. Cubs take after their moms in several ways: they are super-smart, have a keen sense of smell, learn quickly, have good memories and are very adaptable. So, if mom teaches them to avoid people-places and forage for natural foods, they learn to live wild. But if mom shows them how to raid the garbage or bat down bird feeders or sends them in through the pet door to see what’s in the kitchen, the lessons learned can put their lives in danger.

Where’s the Bear Food?

Natural spring and early summer foods like tender leaves and grasses and developing plants are not as calorie-dense and nutritious as the nuts and fruits that ripen later in the year, so all bears travel further looking for food. Mother bears usually have between one and three hungry, demanding mouths to feed. Moms start traveling further looking for food, and cubs are left home alone for longer stretches of time, usually near the den or underneath a handy “sanctuary tree” they can climb in a few seconds.

What’s on the June Menu?

Black bears are omnivores; they will eat pretty much anything with calories. The bulk of their spring and early summer diet what people think of as a salad topped with whatever protein might be available – insects, carrion (dead animals), fish, small mammals, reptiles and amphibians. Nursing mothers need more calories to stay healthy enough to keep producing milk for the cubs and may actually lose weight until more calorie-dense foods become available later in the year and cubs start eating more on their own.

New public artwork is coming to Reed Creek!

Installation of a playable, musical sculpture will occur on the Reed Creek Greenway near the corner of Catawba Street in summer of 2026. This interactive public art piece will feature ceramic tiles made by members of the community. Thank you to all who participated -- your work will be unveiled soon! Stay tuned for the announcement of an unveiling event date.
